★ SUMMARY

Seasoned Product Analyst with 4+ years delivering enterprise SaaS products, now channelling deep expertise in OKR-aligned roadmaps, cross-functional delivery, and data-driven prioritisation. Experienced in prototyping AI-assisted features and translating complex requirements into scalable, user-centric solutions across global Agile environments

📁 WORK EXPERIENCE

Aventra Group (Malaysia)

Senior Product Analyst

09/2025 – Present | Coimbatore

- Spearheaded an HRMS platform integrating 5+ HR workflows within the HRTech domain; tracked adoption through Power BI dashboards, reducing manual HR operations by 35%.
- Defined OKRs & KPIs for a cybersecurity compliance tool within the Governance, Risk & Compliance (GRC) domain; leveraged PostgreSQL to audit data integrity, automating 80% of tracking and reducing audit preparation time from 3 days to 4 hours.
- Worked on a Land & Logistics domain application aimed at eliminating manual processing backlogs through an in-house OCR-based digitization solution; automated document scanning, data extraction, and approval workflows, reducing manual data entry effort by 60% and improving processing turnaround time by 45%.
- Authored 20+ PRDs, BRDs, FRDs, and user stories for enterprise SaaS products using Azure DevOps, enabling numerous Agile sprint cycles with zero scope creep escalations.
- Monitored Jira velocity metrics and burn-down charts for a 6–8 member Agile delivery team within a product operations environment, improving sprint predictability by 20% and reducing delivery blockers

Business Analyst

03/2024 – 08/2025

- Worked on a Marine & Maritime domain legacy modernization project for a client focused on version upgrades and centralized reporting integration across Class, CAP, and Naval modes; enhanced operational reporting workflows, reducing processing delays by 30% and improving cross-system data consistency by 45%.
- Led stakeholder management for corporate and sister website enhancements, driving requirement gathering, content optimization, and digital strategy planning; improved website update efficiency by 40% while supporting consistent brand and user experience across websites.

Tachyon Systems (Australia)

03/2022 – 02/2024 | Coimbatore

Product Analyst

- Led end-to-end product development lifecycle alongside cross-functional dev & design teams, delivering innovative products with measurable market impact tracked via Power BI.
- Delivered gap analysis across 10+ products in Excel/Power BI, driving 3+ product improvements; led WCAG audits raising accessibility compliance by 30%.
- Acted as People Manager for a 4–5 member team; improved onboarding by 30% via structured Azure DevOps processes & MySQL data validation.
- Spearheaded internship program for pre-final year students, integrating fresh perspectives into product teams and maintaining 100% backlog clarity pre-sprint.
- Collaborated with Australian universities on a government-funded market research program, leading cross-disciplinary teams to surface consumer behavior & competitive landscape insights.

Business Analyst Intern

- Conducted user research and mapped 8+ business workflows, identifying operational inefficiencies.
- Collaborated with leadership to document 10+ business requirements and operational processes, supporting early product planning and development.
